

CRAIG HORNE DIRECTOR

Craig is a Service Member of RSL Camberwell. He served in Australian Army special forces for 14 years, including deployments to Papua New Guinea and Afghanistan. He has been awarded five medals from Defence Honours and Awards.

Craig is an experienced board director with significant cyber security knowledge who helps organisations understand and use their informational resources towards achieving their vision and mission goals. He has strong education, skills and experience in technology and has an understanding of both technology and information security to help achieve business objectives of the organisation.

He has been a board director for a \$50 million not-for-profit organisation for three years where he was responsible for doubling membership and acquiring five companies. He contributed to the formation of the 5-year business strategy was a member of the board's Public Policy and Membership committees.

He owns a professional consulting firm, specialising in advisory services for setting information security strategy and policy. His professional career most recently involves working in executive positions at five technology organisations over the past 15 years,

where he was responsible for designing, developing, managing and supporting IT solutions that help clients achieve maximum value for money from IT investments.

His key skills are strategy formulation, management, and stakeholder engagement.

Craig has a PhD in information security from The University of Melbourne, a Master of Business Administration, and Bachelor of Science majoring in Computer Science from La Trobe University. He is a Graduate of the Company Directors Course from Australian Institute of Company Directors, a Certified Specialist in Cyber Security from Australian Computer Society, a Certified Information Security Manager and a Certified Information Security Auditor from ISACA. He has numerous academic and media publications.

Craig's community involvement includes public speaking at technology events especially on information security, volunteering for emergency services, mentoring early-career IT professionals, and charity work. He is a member of the Australian Computer Society and works to uphold their values of public benefit, quality of life, honesty, competence, professional development and professionalism for the past 30 years.
